PROFESSIONAL SUMMARY

MCA graduate with strong foundations in software engineering, application development, databases, and machine learning. Skilled in Python, Java, SQL, REST APIs, and full-stack development concepts. Experienced in building real-time data-driven applications, backend APIs, and intelligent systems using modern development tools and SDLC methodologies. Passionate about problem-solving, scalable application development, and emerging technologies.

TECHNICAL SKILLS

- **Programming Languages**: Python, Java, SQL, JavaScript
- **Web Technologies**: HTML, CSS
- **Frameworks & Libraries**: FastAPI, Streamlit, Scikit-Learn, Pandas, NumPy
- **Database**: MySQL, SQLite, PostgreSQL
- **Tools**: Git, GitHub, VS Code
- **Concepts**: Object-Oriented Programming (OOP), REST APIs, SDLC, DBMS, Data Structures
- **Machine Learning**: Regression, Recommendation Systems
- **Deployment**: Streamlit Cloud, Render

EDUCATION

Ajeenkya DY Patil University, Pune
- Master of Computer Applications (Data Science) | CGPA: 9.09/10 | 2023 – 2025

Karnataka University, Dharwad
- Bachelor of Computer Applications | Percentage: 78.30% | 2020 – 2023

PROJECTS

Global Monitoring & News Intelligence Platform
Tech Stack: Python, FastAPI, SQLAlchemy, React, CesiumJS, PostgreSQL

- Developed a full-stack real-time monitoring platform integrating global news, weather, earthquake, and cryptocurrency data from multiple APIs.
- Built REST APIs using FastAPI and SQLAlchemy for data ingestion, filtering, and retrieval.
- Implemented interactive 3D globe visualization using CesiumJS to display live geo-tagged events.
- Designed database models and optimized backend queries for handling 1000+ live records efficiently.
- Integrated timeline filters, category filters, and automated data pipelines for real-time updates.
- Followed modular backend architecture, Git-based version control, and SDLC principles during development.

AI-Powered Resume Screening System

Tech Stack: Python, Streamlit, Machine Learning, OpenCV, FPDF2

- Developed an AI-powered resume analysis system with resume scoring and job-description matching functionality.
- Implemented face detection using OpenCV/CNN for candidate verification.
- Enabled resume editing and PDF export with dynamic scoring.
- Built interactive UI using Streamlit and integrated ML-based recommendation engine for skill recommendations.

Netflix Movie Recommendation System

Tech Stack: Python, Pandas, Scikit-Learn, Streamlit

- Developed a content-based movie recommendation system using cosine similarity and NLP-based feature extraction.
- Processed and analyzed 10,000+ movie records from TMDB datasets.
- Implemented recommendation algorithms to improve recommendation relevance and user experience.
- Built interactive frontend using Streamlit for real-time movie recommendations.

CERTIFICATIONS

- Python Programming
- SQL for Data Analysis
- Java for begineers
- Data Analytics Job Simulation – Forage
- Power BI for Beginners – Simplilearn

CORE COMPETENCIES

- Backend Development
- API Integration
- Database Management
- Problem Solving
- Software Development Life Cycle (SDLC)
- Agile Development
- Debugging & Testing

ACHIEVEMENTS

Bronze Medalist – Secured Third Rank in MCA (Data Science), Ajeenkya DY Patil University.
